EDUCATION

FPT University

Bachelor of Information Technology in Artificial Intelligent

2025

PERSONAL PROJECTS

Google Ads Performance [link](#)

- Developed an interactive dashboard using **Power BI** to **visualize and monitor** key performance indicators (KPIs) from Google Ads campaign data, such as Cost, Clicks, and Conversions.
- Implemented **DAX** measures to calculate critical metrics including CTR (Click-Through Rate), CPC (Cost Per Click), and Cost Per Conversion for in-depth campaign evaluation.
- Provided actionable insights to identify high-performing campaigns and underperforming areas, enabling data-driven decisions for budget optimization and marketing strategy adjustments.

Uniace Website Traffic & SEO Analytics [link](#)

- Analyzed website traffic and SEO performance for **Uniace.vn** using **Power BI** and **Excel**, processing data from 14,945 IP addresses and 49.70K pageviews over a 24-day period (August 2021).
- Evaluated marketing campaign effectiveness, identifying that the **KOL campaign** generated 2x higher sales (101 orders) compared to the Facebook campaign (46 orders), despite lower add-to-cart rates.
- Conducted **demographic analysis** and **content performance evaluation**, discovering that Excel and Data Analytics topics generated the highest engagement, with 60.95% of users being students primarily from Ho Chi Minh City and Hanoi.
- Identified critical **conversion funnel drop-off points** (only 5.95% add-to-cart rate) and provided actionable recommendations for UX improvements, content strategy, and targeted marketing approach, resulting in data-driven optimization strategies.

Customer RFM Segmentation: [link](#)

- Calculating **Recency, Frequency, Monetary** values by using **SQL**, based on customers' most recent purchase date, number of purchases, and total sales from customers
- **Scoring R,F,M** values by using Quintile range method and combining the scores to segment customers into different groups
- **Analyzing customer behavior** based on segmented groups to help the marketing department implement personalized and differentiated marketing strategies for customers

Analysis Of Monthly Key DRM Distribution Situation [link](#)

- Utilized **Power BI** to analyze monthly key DRM distribution data, identifying trends and anomalies for improved distribution strategies.
- Employed **DAX and SQL** to transform and analyze monthly key DRM distribution data, ensuring accuracy and providing actionable insights for optimizing distribution efficiency

WORK & LEADERSHIP EXPERIENCE

VIS Hanoi, Vietnam

Internship 2022

- Use Reinforcement learning to train specific basic board game's bot. Using greedy algorithm, UCB, neural network to label value, make model, policy training

INDA Hanoi, Vietnam

Internship 2025

SKILLS, ACTIVITIES & INTERESTS

Languages: Upper-Intermediate (Completed FPT University TRS 6 English Program - Equivalent to IELTS 6.0)

Technical Skills: Python for Data Analyst (Pandas, Numpy...)

SQL: Sub queries, CTE, Windows Function, Pivot

Power BI: Data model, visualization

Soft Skills: Teamwork, Problem Solving & Critical Thinking
